

LUT University: Research and Impact Assessment 2019

Template for LUT research platforms

The work of LUT research platforms shall be assessed in connection to the work of Units of Assessments (UoAs). The panel shall not rate research platforms, but give written comments in the Assessment Report. ***The main questions are 1) how have the research platforms succeeded in contributing to the multidisciplinary research and impact of the UoAs, and 2) what are the benefits of internal platform funding (added value) for LUT.*** The UoAs are requested to comment on the work of research platforms in their self-assessment reports. Using this template (max two pages) the research platforms describe their most significant contributions.

Name of the LUT research platform:

List of researchers:

1. Main multidisciplinary scientific goals and achievements
2. Top 5-7 multidisciplinary international publications
3. New recruitments and their contribution
4. Competitive external funding and most significant multidisciplinary projects
5. Creation of novel multidisciplinary collaboration between LUT schools (types, challenges, achievements)
6. Main contributions to the work of LBM and/or LES and/or LENS
7. Most important new international networks (max 5) and new international partners (max 5) including achievements
8. Most influential new collaboration with companies including achievements
9. Societal impact of research
